Professional Summary

Data-focused IT professional with 5+ years of enterprise technology experience at Tata Consultancy Services, complemented by a PGDM in Data Science & Analytics and hands-on experience in SQL, Python, PostgreSQL and Power BI. Experienced in data validation, problem-solving, production support, stakeholder collaboration and process analysis. Built end-to-end analytics projects involving customer retention, cohort analysis, customer segmentation, revenue analysis and interactive BI dashboards. Interested in applying data-driven analysis to solve business problems and support measurable decision-making.

Professional Experience

System Engineer · Tata Consultancy Services India

Chennai · May 2021 - Present

- Support enterprise retail applications and business processes in a production environment, maintaining operational continuity and adherence to service-level requirements.
- Perform data validation and investigation using SQL to identify data inconsistencies, investigate issues and support resolution of production problems.
- Analyze application and business-process issues to identify root causes and communicate findings with relevant technical and business stakeholders.
- Collaborate with cross-functional teams to investigate incidents, validate changes and support implementation of solutions.
- Work with structured data and operational information to troubleshoot issues and support business-process continuity.
- Developed familiarity with enterprise systems, business workflows, production operations and stakeholder-driven problem solving.

Machine Learning Research Intern · Tactii (formerly TalentAccurate)

Remote · Jul 2020 - Oct 2020

- Worked on machine-learning and data-analysis concepts as part of an applied research internship.
- Gained practical exposure to Python and machine-learning workflows.

Machine Learning Intern · Verzeo

Remote · Apr 2020 - May 2020

- Worked on foundational machine-learning concepts and Python-based analysis.
- Developed practical exposure to data preprocessing and machine-learning workflows.

Projects

Customer Retention Analytics & Revenue Recovery ·

May 2026 - Jun 2026

<https://github.com/VigneshJM1999/Customer-Retention-Analytics>

PostgreSQL Python Pandas Power BI Online Retail II

- Analyzed approximately 500K UK e-commerce transactions to understand customer purchasing behaviour, retention and revenue concentration.
- Built SQL-based analytical datasets for customer, cohort and purchase analysis using PostgreSQL.
- Performed cohort retention analysis to evaluate customer behaviour across acquisition cohorts.
- Segmented customers based on purchasing behaviour and revenue contribution.
- Identified a high-value customer segment representing 31.9% of customers and over 80% of revenue.
- Developed a revenue-recovery analysis identifying an estimated £208K potential recovery opportunity under the defined reactivation scenario.
- Built a four-page Power BI dashboard covering executive performance, cohort retention, customer segmentation and revenue recovery opportunities.

End-to-End Retail Analytics Dashboard ·

Apr 2026 - Apr 2026

<https://github.com/VigneshJM1999/Online-Retail-Analytics>

[PostgreSQL](#) [Python](#) [Power BI](#)

- Developed an end-to-end retail analytics project combining SQL-based analysis, Python data processing and Power BI visualization.
- Performed data preparation, exploratory analysis and KPI analysis to identify business trends and performance patterns.
- Designed interactive dashboards to communicate analytical findings and support business decision-making.

Advanced SQL Business Case Studies ·

Jan 2026 - Jan 2026

<https://github.com/VigneshJM1999/sql-practice-portfolio>

[PostgreSQL](#) [SQL](#)

- Developed business-oriented SQL analyses using CTEs, joins, aggregations and window functions.
- Applied advanced SQL techniques to customer and transaction-oriented analytical problems.
- Focused on translating business questions into structured queries and actionable analytical outputs.

Education

PGDM · Data Science & Analytics ·

3.95 · Jan 2026 - Apr 2026
